

Volcanic Semaphore PEVOLCA

GREEN

Please carry on your daily activities as normal.
Please know your physical environment and what to do in case of volcanic activity.

Special plan of civil protection and emergency response for volcanic risk in the Canary Islands (PEVOLCA)

Carbon Dioxide (CO₂) Efflux - TFE12

Seismic Energy Released

Temperature Variations - TFT12

Vertical Displacement - TEIT

Seismicity	Permanent Networks
(Magnitude Richter Scale)	
o < 1.0	■ Seismic Station
1.0 o < 2.0	◆ GPS Station
2.0 o < 3.0	★ Geochemical Station
3.0 o < 4.0	▲ Thermometric Station
4.0 o	▲ Web Camera Station

OBSERVATIONS: The meaning of the semaphore positions are: GREEN = Carry out your activities normally; YELLOW = Be aware of the communications of civil protection authorities; ORANGE = Follow the instruction of the authorities; RED = Total evacuation of affected population. Following the indications of PEVOLCA, we inform that the semaphore is currently in GREEN position; therefore you can carry out your activities normally. This report is updated at 00:00 of 04 July 2025. The diffuse carbon dioxide flux, the released seismic energy and the vertical component of the ground displacement are shown in this graphical report as a multiple of the background values (B). The soil temperature is shown as variation with respect to the average value of the last 12 months.
